

Smartsheet seeks full time senior software engineers to join its development team. In this position you will help design and build the next generation of Smartsheet's award winning Software as a Service (SaaS) offering for collaborative work and project management. You will work with a small, highly efficient team of experienced developers in an agile environment. This is an opportunity to use the latest web technologies to deliver a best-of-breed user experience. We're looking for highly motivated and intelligent individuals who can make an immediate positive impact. This position is based at our headquarters in Bellevue, WA.

Job responsibilities include:

- Participate in the entire development life cycle, implementing new Smartsheet components and features
- Develop Java server code and JavaScript client code, utilizing a number of web technologies such as Ajax, HTML5, CSS, OpenID, OAuth, REST APIs, JSON
- Implement and extend third-party integrations utilizing APIs from Amazon Web Services, Google, Salesforce.com, Zimbra, PayPal, and others
- Participate in all phases of quality assurance and defect resolution

Requirements:

- 5+ years software development experience
- 2+ years JavaScript/Ajax/CSS
- 2+ years Java web application development
- Experience building highly scalable, high availability applications
- Strong problem solving and troubleshooting skills
- Excellent written and verbal communication skills
- Ability to work independently in a fast-paced environment with frequent production releases
- Legally eligible to work in the U.S. on an ongoing basis

Nice to Haves:

- Familiarity with SaaS apps (Google Docs, Salesforce, etc.)
- MySQL database experience (performance, scalability, availability)
- Experience with Apache Lucene
- iPhone or Android native mobile application development experience
- Experience developing, documenting, and supporting REST APIs
- Experience with NoSQL solutions (HBase, BigTable, Cassandra, etc.)
