

Unite Your Teams with the Smartsheet for Jira Connector

Unlock visibility and access to Jira data for all stakeholders.

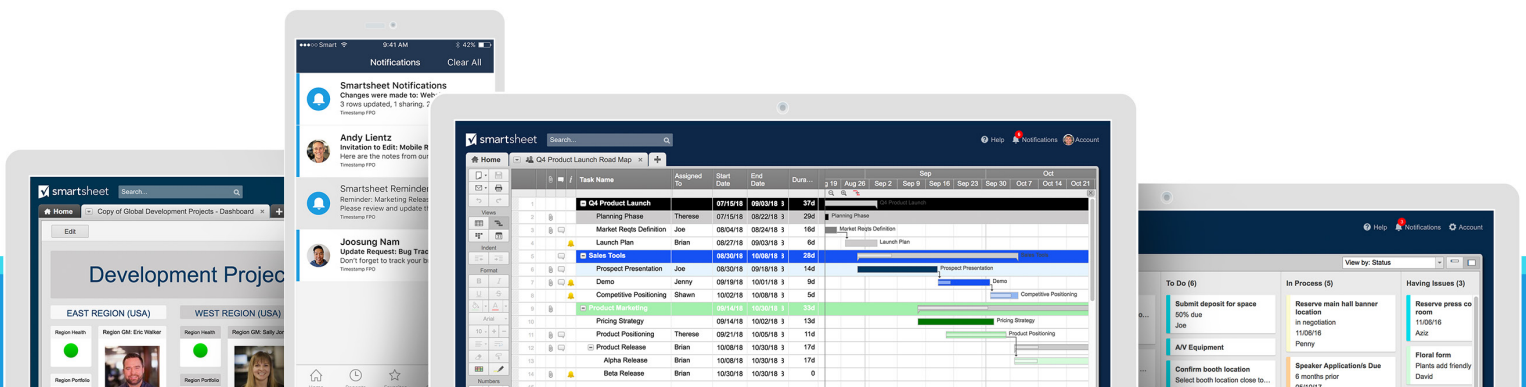

Better Visibility

Give business users instant visibility into IT and software development projects being tracked in Jira. Synchronize your JIRA data to Smartsheet to make bulk changes and manage work easily.

Collaboration Made Easy

Eliminate the manual process of exporting data to spreadsheets. Users can view, share, and edit a set of issues linked between JIRA and Smartsheet. All data is updated in real-time.

View Work Your Way

Easily customize Smartsheet to view only the fields from JIRA you care most about. Visualize work your way with Sights Executive dashboards, Gantt View, Calendar View, or Card View in Smartsheet!

Admin Control

Delegate and permission users to create and view workflows with ease. Users login with Smartsheet credentials to provide seamless, secure access to accounts from anywhere, on any device.

Unite Projects & Instances

Roll-up multiple JIRA instances or projects into a single sheet to create a holistic, interactive dashboard for maximum team visibility and control.
