

Smartsheet + 10,000ft

At Smartsheet, our goal is to empower teams to more effectively plan, track, automate, and report on work — at scale.

With the recent acquisition of 10,000ft, we're excited to expand our offering for Smartsheet customers to include resource and project portfolio management — without the complexity, lacking user experience, and steep cost that comes with many tools on the market.

Used in tandem, Smartsheet and 10,000ft create a robust platform that enables your entire organization to work smarter and make better decisions, faster.

About 10,000ft

10,000ft is a resource and project planning solution that empowers everyone across the organization to make confident operational decisions. Through simple, intuitive design, 10,000ft makes it easy to see and act on critical data across your projects and people. More than 1,000 of the most innovative companies around the world use 10,000ft to scale their business and thrive amidst the speed and complexity of today's work.

Better Together

10,000ft's award-winning software offers Smartsheet customers a powerful new suite of capabilities:

- **Dynamic resource management:**
Effectively schedule and manage your team, resolve conflicts in real time, and forecast staffing needs
- **Accurate project budgeting:**
Visual project dashboards to see progress, course correct, and keep everyone on the same page
- **Flexible portfolio management:**
Confidently schedule projects based on your team's capacity and forecast the project pipeline
- **Effortless time tracking:**
Make it easy for your team to submit hours and keep them focused on the work that matters with pre-filled timesheets
- **Dynamic reporting:**
Visualize complex data to spot project trends, understand performance across the business, and plan for growth

What Our Customers Say

"Finding the perfect platform for a team and business is no small task, and after lengthy research, pilot tests, and demos, we landed on two separate tools: 10,000ft for our resource management and time tracking needs, and Smartsheet for our more in-depth project management and planning needs. We can't wait to see what comes from this integration."

- **David Oliver**
Director of Project Operations, Public Inc.
