

Smartsheet Accelerator for Events

Overview

The Smartsheet Accelerator for Events enables teams to consistently deliver successful events by aligning to the underlying strategy for greater execution. This solution empowers cross-functional teams to create, deliver, and measure the success of events.

Teams are able to drive alignment from strategy through execution, empowering teams to

deliver high-quality events that are measurable. Whether you're producing or attending an event, stakeholders can easily submit requests, utilize automatically generated templates, monitor all the moving pieces, and report on successes.

How does the Accelerator for Events help my organization?

Increase agility to stay aligned from the beginning: Make sure everyone is aligned on goals and desired outcomes for events, from the planning and creation processes.

Monitor real-time performance: Easily visualize the status of all processes at any time that lead to a successful event.

Effortlessly integrate with other systems: Integrate with other systems already in place to sell tickets, create event websites, and event mobile apps.

Replicate processes with ease: Use a simple, pre-built solution to make new templates, workback schedules, workflows, and rollups — with one click.

Realize impact: Understand, show, and prove to leadership the impact that every event had on the business.

Increase Effectiveness:

Make sure that all stakeholders are aligned with the strategy behind an event.

Eliminate Silos:

Ensure that marketing leaders, managers, and individual contributors understand the goals for an event, as well as the necessary pieces that make an event successful.

Create Velocity:

Reduce the manual and tedious work of creating event plans, so teams can focus on what matters most — delivering an engaging event.

Scale with Confidence:

Unlock the power of Smartsheet and easily scale the solution for events across the enterprise.
