

Smartsheet Product Certification Exam Overview

About this certification

Smartsheet Product Certification is a method for users to demonstrate knowledge and application on a range of Smartsheet features, expand their effective use of Smartsheet within their organization, and be recognized as a Smartsheet champion.

Product Certification is composed of two parts

Part 1: A 50-question multiple choice test

Part 2: A 20-question multiple choice test based on a feature manipulation exercise in Smartsheet

Exam Aspects

- Both the Part 1 multiple choice test and the feature manipulation exercise in Smartsheet are untimed.
- You must complete the feature manipulation exercise before attempting the Part 2 multiple choice test, as you will use the end state of your Smartsheet items to answer questions.
- Part 2 is a one-hour timed multiple choice test that can't be paused, so make sure you allot one full hour to complete the exam.
- On average, the exam takes roughly two to four hours to complete.
- To pass Product Certification a score of 80% must be obtained on each part.
- You are able to retake the exam as many times as needed in order to successfully pass.

Benefits of Product Certification Include

- Ability to positively impact the rollout and implementation of Smartsheet within one's organization
- Ability to confidently apply Smartsheet features within one's own workflow
- Recognition at the annual Smartsheet ENGAGE user conference
- Badge recognition on the Smartsheet Community platform
- Capability to upload the certificate to LinkedIn profile

Product experience is a critical component of exam preparation. It is recommended that users have completed either the [Product Certification Track](#) courses, [Smartsheet Foundations](#) training in the Center of Excellence, or have the equivalent experience prior to taking the Smartsheet Product Certification exam.

Click [here](#) for a list of tested items.

Note: Questions for Part 1 of the exam are updated on a regular cadence. It is recommended to complete Part 1 within a single setting to ensure you will not lose exam progress when questions are updated.
