

Data Uploader

Import Data From Your Enterprise Systems in Smartsheet — ERP, CRM, Database & More

Overview

Allow your business users to be more productive and executives to make timely and confident decisions with visibility into data from multiple enterprise systems. Data Uploader allows any enterprise system that can export to CSV, MS Excel or Google Sheets to be automatically uploaded into Smartsheet for visibility & collaboration. Data Uploader securely reads the common spreadsheet formats from cloud storage such as Google Drive or in Smartsheet attachments and updates Smartsheet at a configured schedule.

Visibility to Key Business Data

Connect your critical enterprise systems with the Smartsheet Data Uploader so that your team's key data sources live in the same place you get work done. Almost all enterprise systems can export to a CSV file, Microsoft Excel, or Google Sheets.

Improve Business Decision Making

Smartsheet can automate the data upload process to centralize the disparate data, drive collaboration, provide real-time visibility into multiple business systems, and empower your team to be more efficient through effective work execution.

Unite your platforms — Import data from your enterprise systems into Smartsheet: ERP, CRM, Database, and more.

Centralize information — Any system that can download to a CSV, Excel or Google sheet can be brought into Smartsheet.

Save time & reduce errors — Eliminate hours spent on sorting, filtering, and copying data from other systems into Smartsheet.

Trigger automated workflows — Combine with Smartsheet Control Center to configure powerful solutions that automate intake and the creation of Smartsheet projects based on events in external systems.

Data Uploader

Centralize data from multiple systems into your system of work (Smartsheet) for visibility and collaboration. Great for:

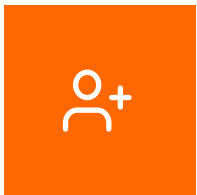

PMO Directors

Automate Smartsheet project creation from an inhouse CRM or ERP.

IT Manager

Enable business users to easily bring their data into Smartsheet.

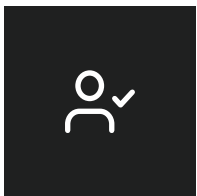

Vendor Relationship Managers

Receive data from their vendors in CSV or Excel.

Delivery Managers/Directors

Plan upcoming pipeline managed in an external system.

C-Suite Executives

Have complete program oversight from one system.
